

**Textbooks**

There are no required textbooks for this class. Since the foundations of classical mechanics were formulated long time ago, any old good textbook may work very well. Students may use any university physics (calculus based) textbook for this class.

**Books recommended by the physics department for the course**

- Understanding Physics by Cummings et al, (Wiley & Sons, 1<sup>st</sup> edition)
- University Physics by Young & Freedman, 10th, 11th, 12th editions, (Addison Wesley)
