CONTENTS

Introduction

Geobiology—a holistic scientific discipline N. Noffke	1
--	---

Research Papers

Geobiology and the fossil record: eukaryotes, microbes, and their interactions D.J. Bottjer	5
Geobiology and paleobiogeography: tracking the coevolution of the Earth and its biota B.S. Lieberman	23
The contributions of biogeomorphology to the emerging field of geobiology L.A. Naylor	35
Temperature and salinity history of the Precambrian ocean: implications for the course of microbial evolution L.P. Knauth	53
Production and cycling of natural microbial exopolymers (EPS) within a marine stromatolite A.W. Decho, P.T. Visscher and R.P. Reid	71
Microbial mats as bioreactors: populations, processes, and products P.T. Visscher and J.F. Stolz	87
Geobiology of microbial carbonates: metazoan and seawater saturation state influences on secular trends during the Phanerozoic R. Riding and L. Liang	101
The role of microorganisms and biofilms in the breakdown and dissolution of quartz and glass U. Brehm, A. Gorbushina and D. Mottershead	117
Expanding frontiers in deep subsurface microbiology J.P. Amend and A. Teske	131
Microbial transformations of organic matter in black shales and implications for global biogeochemical cycles S.T. Petsch, K.J. Edwards and T.I. Eglinton	157
Geo-biological aspects of coastal oil pollution L. Berthe-Corti and T. Höpner	171
Biogeochemistry: now and into the future G.A. Cutter	191
